

COOL WORX™

Superior Heat Transfer and Protection

**This equipment has been protected by
Nu-Calgon's Cool Worx coating system.**

To maintain the coil's optimal performance use Nu-Calgon's Cal-Green, Tri-Pow'r HD, or Blackhawk coil cleaner every six months. Acidic or alkaline brightener coil cleaners will damage the Cool Worx coating and void warranty.

Do not use any solvent cleaner or any high-pressure water sprayer to clean coil.
